CLASSIFICATION CODES, WORKED THROUGH

LIVE TERMINALS YOU CAN TOUCH. WHICH CODE?

Q8Book
During the café periodic you find a fused spur with a cracked faceplate, and the live terminals can be touched through the crack. Which code?

1. **a**C3
2. **b**C2
3. **c**C1
4. **d**FI

Answer c (C1). Live parts that can be touched mean **danger is present** right now. Nothing else has to happen for someone to get hurt. GN3 isn't great on codes overall, but Table 3.5 says it.

CODE	MEANING
C1	Danger present. Immediate remedial action needed.
C2	Potentially dangerous. Urgent remedial action needed.
C3	Improvement recommended
FI	Further investigation is advised

GN3 · Table 3.5 · classification codes · C1 danger present · **p.132**

THE CODE MEANINGS ARE FROM THE EICR FORM
