CLOSING ADVICE FOR THE INSPECTION AND TESTING EXAM

INSPECTION AND TESTING QUESTIONS, IN A MINUTE.

- Seventeen questions, and every one sends you to Guidance Note 3. Finding your way round the book is the skill.
- **Know your way around the book.** Summarise each section in your own words so you know where things are.
- For every test, know **why** it's done: the bottom-line reason. That's what Level 3 questions test.
- It doesn't matter if a mock takes you **three hours**. That just shows you need more practice with the book. The real exam has a timer, so build your speed **before** you get there.
- The people who pass are the ones who **learn the subject**, not the ones who just do mocks. *"When you learn the subject, you can answer any question."*
