HOW INITIAL VERIFICATION IS ASSESSED, AND WHERE THE FORMS LIVE

HOW MANY QUESTIONS, AND HOW LONG?

HOW INITIAL VERIFICATION IS ASSESSED

PART	FORMAT
Theory	Online multiple choice, **open book**, **50 questions**, **100 minutes** (one hour forty)
Practical	A practical assessment in two parts — you complete an **EIC** on a **simulated installation**

The theory paper is not only about initial verification.

You may need knowledge of **periodic** inspection and of the **fundamental** safety material too — all three sit in the same book.

ONE BOOK, AND WHERE THE FORMS LIVE

Be warned, it is a **theory-heavy book**.

BOOK	WHERE THE FORMS ARE
Guidance Note 3	**Section 5** · 5.4, completed examples
BS 7671	**Appendix 6**

The blue markers down the side of Guidance Note 3

are the **BS 7671 regulation numbers** each passage relates to. Follow the testing and inspections in this book and you are complying with BS 7671 — that is what the markers are telling you.
