INSPECTION IS NOT JUST LOOKING

IS INSPECTION JUST LOOKING?

The single idea that runs through all of inspection: **your senses are integral to the inspection**. Not one of them — all of them.

SENSE	WHAT IT IS TELLING YOU
Smell	Burning. A cable or accessory that has been running hot
Sight	Cracks in accessories, cut cables, damaged mechanical protection
Touch	Loose accessories, loose terminations, anything that moves that should not

✋ **Why this gets asked.** "Inspection" sounds like looking, and candidates answer as though it is. It is a deliberate check with every sense you have.
