# SAFE ISOLATION: WHAT THE ASSESSOR IS WATCHING

## YOUR HANDS, OR YOUR EXPLANATION?

Your **hands**, not your explanation.

- Do you move **one hand at a time**, and never cross your arms over the board?
- Do you start on the **safest combination** and work along?
- Is the key visibly **on you**?
- Do your leads pass GS38 on sight — guards on, tips 2–4 mm, no nicks?
- Did you **re-prove**?

> **If something does not make sense, stop and find out why.**
> Retest to confirm, then ask, look it up, or try another instrument. Do not carry on through the sequence hoping it resolves itself. That is as true in the assessment as it is on site.
