SIGNING THE CERTIFICATE, AND HOW INITIAL VERIFICATION IS ASSESSED

CAN YOU WRITE IN YOUR BOOKS?

FILLING IN AND SIGNING THE CERTIFICATE

The **Electrical Installation Certificate** carries the schedule of inspections and the schedule of test results, and the final circuits are entered one row per circuit.

> ✋ **Signatures and dates.** The closing point. A certificate without the signatures and dates completed is **not a certificate**.

THE EXAM, AND THE PRACTICAL ASSESSMENT

Initial Verification is assessed by a **written paper and a practical assessment** — you will be asked to carry out the tests, not just describe them.

> ✋ **No written notes.** Worth repeating: the exams are open book, but you cannot bring written notes and you cannot write in your books. **Highlighting, underlining and tabs only.**
